Dear Sir or Madam:

I’m writing to ask you to take part in an important national survey sponsored by the U.S. Department of Health and Human Services. The Health Information National Trends Survey has interviewed thousands of people in the last few years. From it we’ve learned that:

- About 4 out of 5 adults believe that there are so many recommendations about nutrition that it is hard to know which ones to follow.
- About one in four adults read the health section of a newspaper or magazine every week.
- Almost half of all adults don’t know the age at which to begin screening for certain types of cancer.

With information like this, the survey can help the government and companies get valuable information on health to you and your family.

Your household was chosen at random for this survey and cannot be replaced. **We ask that each adult (age 18 or older) in this household complete a questionnaire and return it to us in the postage-paid envelope at your earliest convenience.** What you have to say will help us find out how we can best provide the health information people need.

Westat, a research firm under contract with the U.S. Department of Health and Human Services, is administering the survey. Your answers will be kept confidential to the extent provided by law. More information about the study is provided on the back cover of this booklet.

Thank you in advance for your cooperation. If you have any questions about the study or you would like to request more questionnaires, please call Westat toll-free at 1–888–636-6540.

Sincerely,

Bradford W. Hesse, Ph.D.

The Health Information National Trends Survey is authorized under 42 USC, Section 285a
Each adult (age 18 or older) living in your household should fill out one questionnaire. Please be sure that each adult has an opportunity to fill out a questionnaire. This is very important to the success of the study.

Including yourself, how many adults (age 18 or older) live in this household?

Number of adults in household

If more questionnaires are needed, please call 1-888-636-6540.

Not all of the questions will apply to you – you will sometimes be asked to skip questions based on your answers. In addition, certain sections of the questionnaire may not apply to you.

To answer a question, simply check the box that best represents your answer.

Please choose only one answer per question, unless the question indicates Mark all that apply. Your best estimate is fine.

The Privacy Act requires us to tell you that we are authorized to collect this information by Section 411.285a, 42 USC. You do not have to provide the information requested. However, the information you provide will help the National Cancer Institute’s ongoing efforts to promote good health and prevent disease. There are no penalties should you choose not to participate in this study.

Public reporting burden for this collection of information is estimated to average 25 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: NIH, Project Clearance Branch, 6705 Rockledge Drive, MSC 7974, Bethesda, MD 20892-7974, ATTN: PRA (0925-0538). A stool or fecal occult blood test is done at home to check for colon cancer. You send your stool sample to the doctor’s office or lab for testing. This does not include drugstore or pharmacy test kits.

A colonoscopy and a sigmoidoscopy are both tests that examine the bowel by inserting a tube in the rectum.

- During a colonoscopy, you may feel sleepy and need someone to drive you home.

- During a sigmoidoscopy, you are awake and can drive yourself home after the test

Some Frequently Asked Questions
about the
Health Information National Trends Survey

Q: What is the study about? What kind of questions will you be asking?
A: The study concerns health and how people receive health information. For example, we will ask how you usually get information about how to stay healthy, the sources of information you most trust, and how you might like to get such information in the future. We will also ask about your beliefs on what contributes to good health, how best to prevent cancer, your participation in various health-related activities, and related topics.

Q: How will the study results be used? What will be done with my information?
A: Findings will help the U.S. Department of Health and Human Services promote good health and prevent disease, by determining ways of better communicating accurate health information to people.

Q: How did you get my address?
A: Your address was randomly selected from among all of the known home addresses in the nation. It was selected using scientific sampling methods.

Q: Why should I take part in this study? Do I have to do this?
A: Your participation is voluntary, and you may refuse to answer any questions or withdraw from the study at any time. Your household was selected randomly using scientific sampling methods, in order to reach a sample that reflects the entire population of the United States. You represent thousands of other households like yours, and you cannot be replaced. Your answers and opinions are very important to the success of this study, as you represent others who share your knowledge and beliefs.

Q: Will my answers to the survey be kept confidential?
A: Yes. Your answers will not be revealed to anyone but the researchers in a way that identifies you or your household, to the extent provided by law.

Q: How long will it take to answer the questions?
A: About 20 to 30 minutes.

Q: Who is sponsoring the study? Is this study approved by the Federal Government?
A: The study is sponsored by the U.S. Department of Health and Human Services. The study has been approved by the Office of Management and Budget (OMB), the office that reviews all federally-sponsored surveys. The OMB approval number assigned to this study is 0925-0538.

Q: Who is Westat?
A: Westat is a research company located in Rockville, Maryland. Westat is conducting this survey under contract to the U.S. Department of Health and Human Services.
