[HE-4 INTRO] This research study is about people's knowledge and beliefs about health issues such as cancer as well as how they get the information they need. You may have received a letter from the National Cancer Institute introducing this study. I have some questions to see whether you or any member of your household may be eligible to participate in this survey.

SCQHE4Intro

HE-4. Including yourself, how many people aged 18 or older currently live in this household?

[IF NEEDED: "Include people who usually stay in this household, but are temporarily away on business, vacation, or in the hospital. Do not include persons who are away on full-time active military duty with the armed forces, students living away from home in their own apartment, or any other family member who may be in a nursing home or other institution."]

Have you ever heard of a sigmoidoscopy or a colonoscopy?  

YES...................................................................................................... 1  
NO........................................................................................................ 2  (CC-26)

[Just to review], a sigmoidoscopy and a colonoscopy are both tests that examine the bowel by inserting a tube in the rectum. The difference is that during a sigmoidoscopy, you are awake and can drive yourself home after the test; however during a colonoscopy, you may feel sleepy and you need someone to drive you home.

Have you ever had …
